DEVIATION REPORT: DEV-2026-0842

Facility: API Synthesis Plant 3 - Reactor Bay B

Product: Paracetamol API - Batch PRC-26-0419

Date: 2026-10-24 | Severity: Critical

Summary: High Impurity C Related Substance detected in Paracetamol synthesis.
During acetylation, temperature reached 92.4C due to pneumatic valve MV-102 failure.
Cooling jacket valve jammed at 30% open stroke. Yield dropped to 68.2%.
Batch placed on immediate quarantine hold pending root cause investigation.
